Concept Note

Educational transformation brings out Competitiveness, Employment, Economic Development, Citizenship, Social Cohesion and humanity. The journey to creating a successful learning environment starts with visionaries like you. India is country of youth with continues changes, innovations and creativity in which research play vital role to bring out the revolution in the educational system. This transformations happen in education through awareness of our own human rights, including all marginalized section with advanced technologies in education. By developing a strategic plan to drive change, you can bring your educational vision of life.

Our comprehensive symposium on educational transformation through Human Rights Education, Inclusive Education, ICT and Research provides insights, best practices, and practical strategies to advance your higher education vision of

education transformation. This symposium will provide a platform for pupil teachers, research scholars and teacher educators to share, update their knowledge and develop an insight to solve the present challenges emerging in education.
